■ More than 18 years of experience in serving ski resorts, and not only

▲ Since it was founded in Annecy - France at the beginning of the 90's years, TRINUM is dedicated to program software package for ski resort technical data and guest information system management.

Our offered software and attached facilities can cover:

- Human resources, skilift / pisten bully / snow making system maintenance management,
- Guest information system management (webcams - more than 250 installations, data center for video channel broadcasting, leds information display...),
- Audio and video project design for transportation applications "de prestige".

Today, TRINUM is working for more than 130 ski resorts, in the French, Swiss, Andorran, Scottish mountains.

Our organization is focused on the necessity to take in consideration the technical constraints of our clients and the ski resort management specificities.
